Motion: hiring of Plant Health Care Model coordinator

Rationale: Each year RPIRG hires a part time student to assist with the Plant Health Care Model (PHCM) research project, in partnership with researcher and faculty member Dr. Tanya Dahms. The wages for this contract do not come out of RPIRG's budget, the research project manager secures the funding for the position and transfers it to us. Our role is to hire the person, get them set up, pay them, and assist with ordering supplies when necessary.

Motion:

That RPIRG hire Ahmad Aljendi as Plant Health Care Model Caretaker for spring/summer 2018, with the attached employment contract.

Result: passed
